Website /ICT/Self (or) e-learning Committee

(Academic Year 2022-23)

Information and Communication Technology (ICT) in education is very helpful in improving the quality of education and obtaining expert knowledge from any corner of the World. A society can become a knowledge society if the ICT tools and the e-Learning Technologies are effectively utilized. E-learning and technology-oriented learning is also facilitated to the students through language lab, e-library and smart class rooms. Power point presentations are an integral part of the teaching methodology in most of the courses. They ensure not only effective knowledge transfer but also facilitate follow up interactive sessions with the students. The institution encourages the staff members not only to upgrade their academic profile but also their pedagogical strategies by offering advanced and latest ICT facilities.
